

Tables and coffee tables

H2

design: Piotr Kuchciński

The unusual shape of H2 tables breaks the office convention. They attract attention with the dainty, graphic form of the base. Minimalism is universal. The tables fill up and complement spaces with any aesthetic qualities, from modern to classic interiors. They easily match practically every type of seat. Despite their optical delicacy, the design of the tables retains the required rigidity, even with the application of tops of considerable sizes. The uniqueness of H2 tables is highlighted by prestigious awards such as the Red Dot Design Award, Dobry Design, Top Design Award, and the Dobry Wzór award.
